

## **Mine Superintendent**

### **Education and/or Experience:**

4-year degree in Mine Engineering or related field and 10 years' progressive experience in underground hard rock operations management.

### **Technological Requirements:**

Working knowledge of applicable engineering fundamentals, including rock mechanics, mine ventilation and mine dewatering; working knowledge of mining methods in both production and development, costs and productivities; working knowledge of MicroSoft Office Suite software programs. Familiarity with Deswik or some form of 3-dimesional mine software is a plus.

This role is an excellent opportunity for a qualified mining professional with strong leadership skills to manage a technically challenging operation and to make a difference on a small team in a dynamic work environment.

The Galena Mine is in the heart of beautiful north Idaho noted for its incredible outdoor recreational opportunities.

Americas Gold and Silver offers competitive wages and a full employee benefit package.
